About

Full stack web developer with a background in electronic engineering. I've built everything from SaaS platforms with role-based auth to an offline-first PWA point-of-sale system and a browser game averaging 3,000 daily players. I work primarily with TypeScript (React), Python (FastAPI, GraphQL), and PostgreSQL, deployed on AWS and GCP.

Experience

Aura Solar - Remote | Full Stack Web Developer | January 2026 - April 2026

Tech Stack: *React, TypeScript, TailwindCSS, Python, FastAPI, PostgreSQL, Supabase, Deno*

- PoS Application Development: Built a point-of-sale web application for a solar panel and energy self-sufficiency company, handling inventory and sales transactions.
- Offline-First PWA: Implemented the app as a Progressive Web App with IndexedDB for offline data persistence, ensuring uninterrupted operation without network connectivity.

SeniorThrive - Remote | Full Stack Web Developer | March 2025 - October 2025

Tech Stack: *React, TypeScript, TailwindCSS, Python, FastAPI, Strawberry GraphQL, PostgreSQL, Prisma, Supabase, Auth0, GCloud, Deno, Node.js*

- React Application Development: Developing a SaaS web application with CRUD capabilities. Designed and implemented a **role-based membership management system**, enforcing authorization both client and server-side.
- API Development: Implemented an API using Python with GraphQL and FastAPI for CRUD operations and external services, such as recommending tailored Amazon products and YouTube videos based on AI analysis.
- Cloud Infrastructure: Built a dual access token system between Supabase and Auth0, improving security and seamless user authentication across services.

OptiGrow Consulting Group - Nicaragua | Frontend Web Developer | September 2024 - October 2024

Tech Stack: *Svelte, TypeScript, TailwindCSS, AWS S3*

- Svelte Application Development: Developed a dynamic web application using Svelte, TypeScript, and Tailwind.
- AWS Cloud Deployment: Successfully deployed the application on an AWS S3 Bucket.

Ecuación Futuro - Nicaragua | Frontend Web Developer | April 2024 - August 2024

Tech Stack: *Svelte, TypeScript, TailwindCSS, AWS EC2, Nginx*

- Web Application Development: Developed and deployed a web application using Svelte, TypeScript, and Tailwind.
- Cloud Deployment: Deployed the application on an AWS EC2 instance using Nginx.

Desarrollo Integral - Nicaragua | Full Stack Web Developer | June 2023 - March 2024

Tech Stack: *Python, Flask, psycopg2, Strawberry GraphQL, PostgreSQL, React, TypeScript, TailwindCSS, Apollo*

- Database Automation: Developed a script that automatically scraped data from Google Sheets and converted it into a PostgreSQL database.
- API Development: Created an API using Python, psycopg2 and Strawberry GraphQL, serving through flask.
- Front-End Collaboration: Assisted in designing and building a React application using TypeScript and Tailwind.

Personal Projects

Yawns ([Github](#) • [AUR](#)) | Developer and Maintainer - Published on AUR, 2024

Tech Stack: *Python, PyQt5, DBus interface*

Themeable Linux notification daemon. Implements full DBus spec, supports extensible “Yawn” layouts, and ships as an AUR package.

ULTRAKIDLE ([Website](#) | [Discord Activity](#)) | Full Stack Developer - February 2026

Tech Stack: *Vite, React, TypeScript, TailwindCSS, Supabase, Deno, Python, FastAPI*

Wordle-inspired guessing game for ULTRAKILL, built as both a web app and a verified Discord Activity. Reached ~3,000 average daily players within the first week of launch. Implemented anonymous sign-in, daily puzzle rotation via database cron jobs, and Discord Embedded App SDK integration.

Desmoche Online ([Website](#)) | Full Stack Developer - November 2025 (Ongoing)

Tech Stack: *Vite, React, TypeScript, TailwindCSS, Supabase, Deno*

Online platform to play the Nicaraguan rummy card game Desmoche. It offers live matchmaking and fully functional DnD based controls.

Education

Universidad Nacional de Ingeniería Managua, Nicaragua

B.S. in Electronic Engineering

All coursework completed; thesis pending

Skills

Frontend: React, Svelte, TypeScript, Tailwind • UI/UX & Performance

Backend: Python (FastAPI, Strawberry GraphQL), PostgreSQL, Prisma • API & Data Modeling

Infra: AWS (EC2, S3, Nginx), GCP, Supabase, Auth0, Linux Admin, SSH, Shell Scripting, Git

Languages: Spanish (Native), English (C2)

Certifications

CS50x through CS50x.ni, June 2020

Harvard University
